

Tehnostel-Car SRL increases the quality of its Bovine Breeds

Tehnostel-Car SRL was established in 2002. The company is specialized in slaughtering and commercialization of meat. Tehnostel-Car has always pursued a strategy of continuous improvement in its technological processes, applying rigorous standards in all activities and regular investments in modern technology.

In order to further develop the breeding activity, the company constructed new stables. That led to the idea of increasing the quality and safety of the bovine breeds in Moldova by purchasing certified Angus cattle for reproduction. The animals were imported from certified Ukrainian breeding companies. With the investment the company vastly improved its biological assets.

For project financing, Tehnostel-Car SRL applied for a EU4Business-EBRD Credit Line loan and additionally the company received free-of-charge technical support from the team of international experts.

After the successful project verification the Company received 15% of the loan amount as a grant cashback, funded under the EU4Business initiative of the European Union.

With the investment made, the company will continue its activity in compliance with the wide variety of European standards:

- Regulation (EU) 2017/625 of the European Parliament and of the Council of 15 March 2017 on official controls and other official activities performed to ensure the application of food and feed law.
- Council Directive 2004/68/EC of 26 April 2004 laying down animal health rules for the importation into and transit through the Community.
- Regulation (EC) No 540/95 of 10 March 1995 laying down the arrangements for reporting suspected unexpected adverse reactions to medicinal products for human or veterinary use.
- Commission Regulation (EC) No 1662/95 of 7 July 1995 laying down certain detailed arrangements for implementing the Community decision-making procedures in respect of marketing authorizations for products for human or veterinary use.
